SilverBack™ Racking Labels

SilverBack™ is a new label solution which can be adhered in all warehouse temperatures.

Label solutions can be varied in both man-down and man-up fork lift pallet racking applications. We aim to design the most appropriate and cost-effective application.

Types of Labels

- 1. Split beam label** – To identify a location on the ground and a pallet on the first beam level.
- 2. Upper beam label** – To identify a location on beams above the split beam label location. On man-up applications where the operator is closer to the label these can be smaller than in man down applications.
- 3. Upright label** – Applied to the racking upright and used in man-down applications to enable the operator to scan upper locations at low level.
- 4. Stepped beam label** – Also used in man-down applications but applied to the beam to enable the operator to scan upper locations at low level.
- 5. Level indicator** – A simple but cost-effective way of identifying a beam level in man-down applications. A coloured label is applied to the beam and matches the location colour shown on the upright or stepped beam label.

Labelling and Safety Solutions

"Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, by offering clients a quality-driven, total solution via multi-channel procurement methods."

Tony Gresty - Managing Director

About Us

At ELAN Europe we have gained an excellent reputation for providing the most appropriate labelling and safety products to meet the specific requirements of our customers. By providing a range of products in each of our specialist fields we are able to provide the optimum solution for every client from one source.

From the beginning, we have been constantly developing our products and services. We have a considerable depth of knowledge in all labelling and industrial floor marking and painting systems specific to the warehousing and distribution industries.

Our success in developing line marking to provide personnel segregation systems, is complemented by our other safety solutions which include internal security mesh, safety signage, plus barrier and column protection.

Our unique product and service offering is very attractive to companies looking to satisfy all their needs from a single source.
